

## **Beijing Airport Entry Regulations for Covid prevention and control updated on Oct. 21, 2022**

### Latest Provisions of Beijing Entry Policy

In order to further improve the prevention and control of COVID-19 in Beijing, from June 30, 2022, the control method for the international entry travelers were adjusted as follows:

All international passengers will be implemented 7 days of centralized isolation under medical observation, plus 3 days of home-stay self-monitoring. If the travelers will go to their final destinations of China. There will continue to carry on implementation. For the people of direct tight contacting, there requires 7-day home isolated medical observation.

Latest requirements for all in-and-out passengers at Beijing Airports: All passengers are required to show negative nucleic acid test certificate within 72 hours or nucleic acid sampling certificate within 24 hours. All personnel entering the two Beijing airports terminals must wear masks and accept infrared non inductive temperature measurement. The China travel restriction rules and regulation keep on updating, Please contact the below airlines you purchased flight ticket to check out the newly updated epidemic prevention policy of your destination.

Above information might be changed without prior notice.
